Train Crew Exonerated In Death of Transient

The inquest into the death of Fred Edhardt Hansen who was killed while attempting to board the mixed train at the Didsbury yards Tuesday October 10th, was held at Duerre's funeral parlour on Tuesday afternoon before Dr. J. L. Clarke, coroner.

The jury consisted of Messrs. C. H. Adshad (foreman), Henry Goehring, M. B. Clemens, J. Hugget, C. Bellamy and W. S. Durrer.

Mr. Stewart Tigh gave evidence identifying the deceased and stated that Hansen had worked for him three weeks, and had been paid a dollar the morning of the accident. Mr. Harold Tigh corroborated this evidence.

Conductor McDougall, who had charge of the train, stated that he saw the man attempt to board a tank car on the train and he was thrown to the ground. He immediately got up and tried to get onto the front end of the coach, but failed and caught the iron on the back of the coach and was thrown between the coach and the caboose. The conductor stated that he pulled the emergency brake and brought the train to a standstill. He had warned the man to keep away from the train.

Mr. P. Miquelon corroborated the conductor's evidence.

Dr. W. G. Evans gave evidence of having examined the deceased and found his right leg to have been severed above the knee and the left leg between the knee and ankle. The cause of death was from shock and loss of blood.

The jury brought in the following verdict: "Fred Hansen came to his death by attempting to board C.P.R. Train No. 604, and the accident was entirely his own fault, and we exonerate the train crew and command their action in the emergency assistance given."

KNOX UNITED CHURCH NOTES

Rev. H. D. Marr, of the British and foreign Bible Society, will preach in Knox United Church, Didsbury on Sunday, 22nd October, 1933.

LOCAL & GENERAL

Miss E. W. K. Terry, of Calgary is visiting with Mrs. Ivan Weber.

The Rev. H. D. Marr, of Calgary will bring the message at the morning service at Zion Evangelical Church next Sunday. In the evening the Pastor's subject will be "The Barred Gate and the Open Door."

Misses Alice and Molly Pearson were visitors to the southern city on Saturday.

Miss Leah Pandy, of Sarnia, Ont. is returning here to attend the Mount View Bible School.

Teachers, Attention!—We have in stock a specially designed report card for public or rural schools. Call in and see sample—Didsbury Pioneer.

Mr. Mose Shantz, who has been in the High River Hospital for some time, has recovered from his illness and is now staying with his son Vernon at High River.

Mr. Otto Mueller, is visiting with his sister, Mrs. A. C. Fisher. He leaves next week for Montreal to attend the wedding of his brother, Dr. Mueller.

Mr. and Mrs. Larry Leavens announce the birth of a daughter, Patricia Anne, in the Didsbury General Hospital, Saturday, Oct 7th, 1933.

Don't forget the Eastern Star Annual Dance at the Didsbury Opera House on Wednesday, October 25. Calgary Orchestra. Prizes given for best oldtime waltz and best fox trot. Admission 50¢ each.

The annual meeting of the Didsbury Rinks Limited is called for this Friday evening at the office of Messrs. Fisher and Edwards, when arrangements will be made for the coming winter. All shareholders are asked to attend.

Mr. George Pyke, of Montreal, announces the engagement of her daughter, Blanche Louise, to Dr. William Henry Mueller, son of the late Mr. and Mrs. William G. Mueller of Didsbury. The marriage will take place quietly early in November.

Mr. W. A. Austin went to Edmonton on Friday, where he was a member of the delegation to confer with the cabinet regarding changes to the Town Act. Mr. Austin is a member of the legislative committee of the Alberta Union of Municipalities.

At Didsbury

Car Accident At Minaret

What might have been a very serious accident took place at Minaret on Tuesday when the noon passenger train and the car of Mr. A. Bautin collided.

Mr. Bautin had been to the Minaret elevator and on leaving there was driving west at the crossing. Apparently he did not see the approaching train and drove into the rear of the train cutting the radiator and carried it down the track. The impact swung the car around and overturned it.

The train stopped and picked up the passengers of the Minaret. Mr. Bautin, two grandchildren and Miss Margaret Radford, taking them to Didsbury, where at the Hospital it was found they had received only superficial injuries. After treatment they were all able to proceed home.

Curling Club Will Organize

These snappy mornings are making the curling fans think of the "brain game," and the annual meeting of the Curling Club is called for next Tuesday evening at 8 o'clock in the P.R. waiting room, when election of officers and preparation for the coming season is the business to be transacted.

Stockyards Busy.

It was a busy day at the Didsbury stockyards on Tuesday, when ten carloads of stock were handled.

Mr. J. Casey shipped in 3 carloads of feeder cattle, and Mr. J. Eubank a carload.

A carload of horses purchased in the district were shipped to Nova Scotia; Mr. W. Davies shipped a car of cattle to Vancouver; one car of cattle and three cars of hogs were shipped by the dealers.

Celebrates Thirtieth Anniversary of Business

Mr. J. V. Berscht is this month celebrating the 30th anniversary of the establishment of his business in Didsbury.

It was in October, 1903 when Mr. Berscht opened his first store, a small building 16x20 ft. on the same lot now occupied by his present store, and carried on a shoe-repair business together with a small stock of boots and shoes. A year later he added gloves and mitts to his line, and as time went on added different lines until he had one of the best appointed men's furnishing and clothing stores in any small town in the province.

During his long period of business

Mr. Berscht has had his ups and downs and his store twice destroyed by fire, first in 1914 and again in 1925, but each time he rebuilt with larger and better appointed premises.

It is interesting to note that

Mr. Berscht and Mr. A. G. Studer are the only two men left in active business who were in business at the time of the establishment of the Berscht store.

During his residence here Mr. Berscht has taken an active interest in the public life of the town. He was a member of the first town council and has served several terms on both council and school board.

He is at present a member of the school board and member of the cemetery board, having been on the board for the last 19 years. He was one of the organizers of the Didsbury Agricultural Society and has held a position on the board since its inception. Mr. Berscht has also interested himself in sport and has been identified with practically all the athletic organizations since the town was established.

Grasshoppers!

Fall Work Which May Be Done This Year Preparatory To Next Year's Crop

The emergency program for grasshopper control in Saskatchewan issued jointly by the Provincial and Dominion Departments of Agriculture, indicates that the following work is of action, which should result in very materially reducing the number of young grasshoppers hatched next spring, and so reduce the amount of damage to the crop in next year's poisoning campaign. It may be accepted with the fullest confidence that where the recommended program is fully carried through, not only will the grasshopper be controlled with splendid effectiveness but the cost of doing so will be only a fraction of the loss which the pest will cause if no control is attempted, or only half-hazard methods used.

Mr. and Mrs. Charles Lindbergh visited the colonel's cousin in Baarby, and planned to continue a flight which may take them to Soviet Russia. Baarby is in southern Sweden.

An aerial motorcycle which can ascend from and alight on a tennis lawn or even the flat roof of a large building, has been making trial flights at Hanworth, Middlesex, England.

Robert Augustus Cheshire, the man who invented vaseline, is dead at the age of 96. He succeeded after a short illness. For 50 years he had manufactured the product he invented.

Death of Sir Alexander Clegg, 82, prominent British industrialist, was reported from London, England. Sir Alexander was president of Barry and Staines Linoleum (Canada) Limited, Farnham, Que.

The Toronto central presbytery of the United Church of Canada unanimously passed a motion presented by Rev. Dr. George C. Paley requesting an investigation into conditions in federal penitentiaries.

School Guide Now Available

Book On School Administration A Guide To Trustees And Teachers

Trustees, teachers and all persons concerned with education will be interested in a book entitled "School Administration" by A. H. Ball, formerly Deputy Minister of Education for Saskatchewan, and N. L. Reid, Assistant Deputy Minister, just published by W. J. Gage Co., Ltd., Toronto. The book is the result of a meeting recently held at Gage's office concerned with school administration. As its name implies, it is designed as a guide for trustees, school officials and teachers. At the same time, it is a valuable preparatory book for those who will apply for the school principalship.

If stubble land must be sown, then the stubble must be sown as soon as possible. If there is a reliable source of information on all matters of school law, The authors, by reason of their experience, are qualified not only with regard to law, but also its interpretation and with the problems of trustees, teachers and ratepayers, and these are fully dealt with.

The book contains, in all, sixteen chapters on such matters as the yearly history and control of education in the North West Territories, the determination of the educational system, school organization, school elections, qualifications for trustees, duties of trustees and school officials, school support, the teacher's agreement, the rights of trustees, etc. The book discusses, by means of questions and answer, definite problems of trustees, parents and teachers. There are some excellent chapters on the subject relating to calculation of teacher's salary, expulsion of pupils, corporal punishment, ouster of trustees, rights of ratepayers, parents and teachers, etc. One fifth of the important school cases that have been adjudicated in the courts are described.

The appendix contains a complete list of laws of the British North America Act, The Northwest Territories Act, The Saskatchewan Act and The Provincial Lands Act of 1931, as well as a list of the laws of the provinces relating to separate schools and religious instruction. A complete index makes it easy to look up any point. The book contains a chapter on the Armistice and the Canadian Curriculum by Dr. John S. Huff, Commissioner of Education. The volume should be found invaluable to those charged with the administration of schools. While it has been written as a Saskatchewan edition, much of its contents will apply in any school system.

You can find some of the people all of the time, and all of the people some of the time, and the rest of the time somebody else will find them.

There is an angling club in Surrey England for bachelor girls only. Now and then a member finds some poor fish and has to resign.

Grasshoppers!

Fall Work Which May Be Done This Year Preparatory To Next Year's Crop

The emergency program for grasshopper control in Saskatchewan issued jointly by the Provincial and Dominion Departments of Agriculture, indicates that the following work is of action, which should result in very materially reducing the number of young grasshoppers hatched next spring, and so reduce the amount of damage to the crop in next year's poisoning campaign. It may be accepted with the fullest confidence that where the recommended program is fully carried through, not only will the grasshopper be controlled with splendid effectiveness but the cost of doing so will be only a fraction of the loss which the pest will cause if no control is attempted, or only half-hazard methods used.

The cultural recommendations include:

1. **Seed Only on Summerfallow,** as far as can this possibly be done. This is especially important in heavily infested areas. Since grasshoppers do not lay their eggs in fall land, unless it is very wet, dry, crop sown on fallow requires only to be protected from invasion from adjoining roadsides or infested stubble. The seed should be given readily and cheaply, by properly using poison bait. The campaign will be rendered immensely less difficult and more effective if more certain in any district where crops are sown only on fallow next spring.

2. **Complete All Seeding Early**, as far as possible. An early sowing of any kind, because during grasshopper outbreaks late crops rarely give a worthwhile yield even of hay, and merely increase the breeding places for the insects.

Oats and barley for grain, as well as the folder and feed crops, may sometimes be sown to advantage before and after the stubble, rather than being left on the last.

3. **Avoid Seeding Any Stubble,** or limit it to carefully prepared land. If stubble must be sown next spring, the precautions in this respect should not be relaxed in the slightest. Under conditions where the infestation is stubble is heavy and general, it is safe to assume that a crop on poorly-tilled land, experience has shown that not only is it impractical if not impossible to save such crops, but also that the swarms of grasshoppers that result will devastate adjoining crops which could otherwise be saved. There is a strong probability that pastures will be saved where crop has been carelessly sown.

Particular attention is directed to what immediately follows, as it is, generally, the most important preparatory work that will apply.

If stubble land must be sown, then the stubble must be sown as soon as possible. The guard-strip must be kept black

Second: A trap-strip 3 rods wide, consisting of land left unworked, to permit green growth, should be left between the fallow and the guard-strip. Similar strips should be left at intervals of 25 to 30 rods, running the length of the field.

The trap between the trap-strips

should be carefully worked or plowed so as to completely destroy all green growth, and the traps should start at the center of the land, running outwards towards the traps, thereby forcing the young hoppers to migrate to the weedy traps for food.

The first trap may be done at any time, but the second trap should be completed by June 1. A second working may be needed to keep down new weed growth, which will be encouraged by the trap.

Third: Poison the trap-strips as soon as they have been harrowed to the three rod width, choosing the first, morning suitable for effective baiting. Additional workings will be necessary if the strips become heavily infested.

It is a mistake to delay baiting too long, as the hoppers may bolt to other fields if they become too crowded, particularly as they approach maturity.

When "strip-farming" is being done, it is particularly important to have the trap-strip as far from the fallow lands where the lands are narrow, the plowed guard-strip around each stubble-land need only be about 12 to 15 inches wide, and the other trap-strips be as far from the fallow as possible.

When the trap-strips are as far from the fallow as possible, the trap-strips towards the middle of each land, leaving a single trap-strip down its center.

It will be noted that in paragraph 4-1, it is recommended that where possible, the guard-strip around next year's stubble be plowed this fall. It should be possible for a farmer to do this, but he should plow the summerfallow next summer and to plow the trap strips this fall as recommended.

Other practices of material importance which may have a bearing on the early control of the disease of cancer can be detected readily by the yellow glow it emits under ultra-violet light, Dr. Dinsdale Kobak of Chicago reported to the American Congress of Physical Therapy.

He voiced a hope that through the ultra-violet agency cancer's deadly growth may be minimized, first by surgery in its early stages, then by assurance, upon surgical operation, that every vestige of the cancerous tissue has been removed.

Dr. Kobak, an editor, and member of the Cook County Hospital staff, explained that any substance submitted to ultra-violet rays gives off its own peculiar fluorescent light.

Cancerous tissue emits a ghostly glow low, glow, instantly distinguishing it from the normal tissue surrounding it and from the benign tumor, which glow in other colors.

Alberta Scholarships

High school students of Calgary, Medicine Hat and Claresholm won the three scholarships granted by the University of Alberta annually to students having the highest standing in the examination covering 21 units of university matriculation examinations.

They were Miss Berroy, Calgary; Melville Donald, Medicine Hat; and Gordon L. Burton, Claresholm. The scholarships provide for three years' tuition and student union fees.

This article is drawn from a reliable source to its report on farming operations during the balance of the open season this year, and is not the final word on this subject. Further information will be given from time to time and it is the intention to endeavour to hold meetings in as many school houses as possible in the severely infested areas during the coming winter.

Northern Scenic Route

Churchill River Trip Offers Many Attractions

The Churchill river offers the traveler a scenic spot not to be found in many places of the world, but it is extremely difficult to negotiate. This is the opinion of R. J. Richards, at 1st. Winnipeg, who this summer paddled a 35-foot canoe from Cold Lake, right into the port of Churchill, a distance of 500 miles.

Mr. Richards, who is not only an artist but a trapper and woodsman, has travelled the far places from the Mackenzie River to the Alps, but he says that the Churchill River holds more dangers than many water trails which have the name of being tough.

South Indian Lake, he says, is also one of the most unfriendly waters he has ever navigated. It is island-dotted, and the islands are upthrusts of sheer rock.

From the time Mr. Richards left South Indian Lake, he never saw a sign of a human until he reached Churchill, a port he spent nearly two months on the trip.

He said it was well worth it. The beauty, he added, was exceptionally beautiful, but that it was no place for a man with a small boat. He was nearly wrecked in rapids and waterfalls on several occasions, and stated that if a traveller ever lost his canoe in the interior he would never get out.

Study Diplomacy

Ultra-Violet Light Can Readily Detect Malignant Growth

The Montreal Herald says: "A number of enterprising associations connected with the civil service of Canada is now taking place and in time it is hoped to have a large central body that will look after interests of all the members."

"Among the associations that will form part of the new association are the Union of Postmen, Amalgamated Civil Service Association, and many others.

The new organization will take the name of the United Association of Civil Service employees and one of the principal objects in view is re-establishment of salaries that were in force before the depression.

"Organization of the central body, and steps taken to get everybody lined up as members, are going ahead rapidly in Winnipeg, Vancouver, Ottawa, Quebec, Toronto and in Montreal as well as other centres.

Fighting Cancer Menace

Ultra-Violet Light Can Readily Detect Malignant Growth

From the medical point of view, growth of cancer can be detected readily by the yellow glow it emits under ultra-violet light, Dr. Dinsdale Kobak of Chicago reported to the American Congress of Physical Therapy.

He voiced a hope that through the ultra-violet agency cancer's deadly growth may be minimized, first by surgery in its early stages, then by assurance, upon surgical operation, that every vestige of the cancerous tissue has been removed.

Dr. Kobak, an editor, and member of the Cook County Hospital staff, explained that any substance submitted to ultra-violet rays gives off its own peculiar fluorescent light.

Cancerous tissue emits a ghostly glow low, glow, instantly distinguishing it from the normal tissue surrounding it and from the benign tumor, which glow in other colors.

OCCASIONAL WIFE

By EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl," Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful, falls in love with Peter Anson, fellow student in an art school. She is the adopted daughter of a wealthy family, and he is a poor, struggling artist. The family of Hoyt spends most of his money to show Camilla a good time, and then decides he must give her up because he cannot stand the expense. A chance meeting, however, paves the way for another date. This time they walk in the park. Camilla tells Peter that it is not rich people's ways to inherit the Hoyt fortune. Peter in turn confesses he is practically penniless. They fall into each other's arms again in the park, and Camilla tries to arrive at some plan for the future. Mrs. Hoyt, Camilla's foster mother, suspects from Camilla's actions that a romance is brewing, and is anxious to see Camilla wed wealth.

(Now Go On With The Story)

CHAPTER X.

It was not long after Camilla knew that Peter Lorenz was her father that he had been killed in a fire at the foundry, thus taking him out of her life almost as soon as he had entered it. The industrial insurance had saved the family's humble home and with three or four of the children working all the time and living at home, Mrs. Lorenz managed a thrifty existence.

She rather gloried in her newly acquired authority and independence, only partially assumed by young Henry, who had taken his father's place in the shop. He was a sub-foreman now, and more popular than his father had been. He carried none of his antagonism and resentment of inferiority. He was the readjusted young American. The Lorenzes lived in a section built up of thirty-laboring-home owners, where women who had toiled now used electric washers and vacuum cleaners, and found time to chat over back fences and linger for delicious bits of gossip on the street and from the market.

Their faces grew brighter and their accents less pronounced, as their figures grew more shapeless and their clothes less shabby. Patches of lawn and clipped hedges added dignity to the rows of frame houses that had been built from one blue-print, while flowers and vegetables flourished in the back yards for beauty and economy. Pungent, spicy odors were emitted from open doors and windows to the four winds, and children laughed and cried and played ball in the streets.

Such was the environment that Camilla learned was hers by right of birth; but however hard she might try, she knew that she never could adopt it for her own again. There were times when she wished devoutly that she had not been selected from that wilderness as a rare flower, to

be transplanted in the sheltered atmosphere of the conservatory. But her studies at National had dispelled that notion, and her meeting with Peter had totally dismissed it. That was why her sudden change of attitude aroused Mrs. Hoyt's curiosity as to the cause.

No opportunity to follow up her suspicions escaped her vigilant eye. She went into Camilla's room often after dinner, especially if Camilla was dressing to go out anywhere, which circumstances inspire women's confidences. She displayed a growing interest in seeing that Camilla looked just right.

"You seem to be happier of late," she suggested pleasantly, one evening.

"Am I?" asked Camilla. "Yes, perhaps I am. School will be out soon."

"Are you so tired of studying?" hopefully.

"Oh, no. Just anxious for September and the beginning of real work," she replied easily, letting a cloud of rose-tinted lace fall over her head and shimmer into folds around her mesh-clad ankles.

For one thing, Camilla rejoiced in spite of her resentment over her false position as Camilla Hoyt—that her wealth provided her with beautiful clothes just now when she wished to appear her loveliest in Peter's

eyes. Of course, he would love her just the same if she wore rags—or a shawl—she told herself. Every woman believes in that supposition, but she never dares to put it to the test.

A misplaced lock of hair, a shiny nose, an unbecoming gown—she lives in a continual dread of her lover's discovery of these mars to whatever beauty is hers.

"May I ask where you are going this evening?" Mrs. Hoyt continued casually.

"The art school classes are having a dance in the auditorium."

"Oh, have you known her for long?"

"Only since I went into Professor Drake's class as a critic."

"Yes, I have taken his work two years ago. I wanted to find out if I had improved any." His smile was charming and included Camilla.

She moved toward the ball anxious to escape the rest of the list of questions. "We are late, now, Mr. Anson. I think we had better be going."

Mrs. Hoyt followed them to the door. "Your car—where is it?" She exclaimed with alarm, as if she thought it must have been stolen, when she saw none waiting outside.

"We're walking—it's only across the park," said Camilla, "and Mr. Anson lives near. I insisted that he shouldn't bring a car."

Camilla knew that was the next item on the questionnaire.

"You mean, has he man?" I don't know. It makes no difference whether he has or not, at a school dance. Class dues pay the expenses." She knew what Amelia Hoyt implied, but she maintained a guileless innocence.

Mrs. Hoyt changed her attack. "From the way you are dressing, I thought you were going somewhere important. That is a new frock."

"Yes, do you mind my wearing it?" sweetly.

"No, indeed. You look very lovely, my dear." She looked at her hastily. "She would like to meet your friend when we call for you."

Camilla thought, "She will have to meet him sometime. I can't see him all summer and prevent it. She

DRAPERY MADE NEW

"When we returned housekeeping a month ago I found my drapes had become creased from packing. I hung them out on the line, hoping to remove the creases. Then I forgot them and they were so bad they became faded and sun-spotted."

"I was heartsick until the happy thought struck me to dye them, just dyed them a deeper green, and just used Diamond Dyes. They look easier dyes to use than Diamond Dyes. They give the most beautiful colors—when you either take the life out of cloth or add life to the cloth as other dyes do."

MRS. J. F. T., Montreal

might even like Peter. I don't see how she could help him." Alone, she replied, "If you wish."

Peter looked his best in evening clothes, as all handsome men do and all plain men do not. Camilla was delighted that Mrs. Hoyt seemed to be impressed favorably with him. Of course, her attitude could make little difference in their lives. So far as Camilla was concerned, Mrs. Hoyt had nothing to do with their future. Her own plans had provided for that. Only her approval of Peter would make the summer less difficult when she discovered that Camilla was seen

"That's ridiculous, Camilla." She turned to Peter. "You must not humor her queer notions, Mr. Anson."

"I like the walk myself," Peter defended her, bowing a courteous good-night. "I promise not to keep her late, Mrs. Hoyt."

"That was sweet of you to let me out about that car," he told Camilla, taking her hand possessively and drawing it through his arm as they walked along the gravel path beside the lagoon. "But that's just it, Camilla. Always, you will have to apologize for me and defend me—"

"Peter! Not always!" she reproached him, stopping suddenly in the path to scold him. "Peter, you have in fact stopped her words. 'Some day I shall be good for you that I shall have to protect you from the admiring throngs.'"

"But that is so far away, dear. The apologies will come first. I'm just afraid that you will get weary of the prologue and won't want to go on with the story—if there is one."

"Is that all the faith you have in me, Peter?" she asked sadly.

He was instantly comforted. "Forgive me, darling, I do believe in you, but sometimes I don't dare to trust myself. You are so wonderful, I can't believe it's all true—your loving me like this, you know."

(To Be Continued.)

Making Liners Cooler

Conard Company Finds White Paint Reduces Temperature Many Degrees

The Conard Line has announced that the "Mauritanian" had been so well received as an all-white cruise liner that they decided to paint the liner "Francisco" white before the beginning of her world cruise next January.

H. P. Borer, general passenger manager of the line, said that engineers of the "Mauritanian" had reported to him on the results of scientific observations taken on the "Mauritanian" during cruises to the West Indies. They took similar readings last year on identical cruises and have reported that the liner is from seven to nine degrees cooler in her white dress.

"I didn't believe it at first," Mr. Borer said. "But they produced the figures and scientific data to show that a white ship must be cooler than black one. So I capitulated."

The "Mauritanian" still one of the swiftest liners afloat despite her age of more than a quarter of a century, has proved popular in the cruises trade. On September 27 the ship will be sent to England for a month for reconditioning. In November the liner will be back again for a series of cruises to last until April.

"We're walking—it's only across the park."

**Use ST. CHARLES MILK**

and your pies, puddings and desserts will have a new delicious melt-in-your-mouth flavor. Try it for creaming soups and for vegetables, in fact whenever a recipe calls for milk. It makes all good cooking BETTER!

**Little Helps For This Week**

"If we love one another God dwelleth in us, and His love is perfected in us."—1 John 4:12.

"And the love of God keepeth His commandments dwelleth in Him, and He in Him. And hereby we know He abideth in us, for by the Spirit He hath given us."—1 John 3:24.

Above in my shadow by Thy love laid me, half-formed purpose and dark thoughts of self. Quench ere it rise each selfish, low desire, And keep my soul as Thine, calm and divine.

The spirit of love must speak the words and work the words of love. It cannot exist and give no sign, or a false sign. It cannot be a spirit of love, and human interests and ambitions. It cannot be a spirit of love, and at the same time make self the prominent object. It cannot rejoice to lend itself to the happiness of others and at the same time be seeking its own. It cannot be generous, and envious. It cannot be sympathizing, and unseemly, self-forgetting and vainglorious. It cannot delight in the rectitude and purity of other hearts, and yet unnecessarily suspect them.—J. H. Thom.

Has Slim Chance Now

If Pedestrian Cars Speeded Up Pedestrian Will Have Hard Time

The pedestrian has a hard enough time as it is; he must hop quickly with a car coming dead at him at 40 miles per hour. If the speed of the car were stepped up to 125 miles per hour he would have no chance whatever. If he stood still he would be struck so hard that identification would be difficult if he jumped with sufficient agility to escape, he could have strained his back and injure his ankles for life. The extent of the jump which he makes today would be a futile gesture. The leap which would deliver him from a car speeding at 40 miles per hour would be of no use whatever when pitted as a safety measure against one speeding 125 miles an hour.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile

—No Calomen necessary

For you to feel healthy and happy your liver must be in good condition, and this means a good flow of bile every day. Without that bile, you will feel tired, listless, and listless.

For you to feel healthy and happy your liver must be in good condition, and this means a good flow of bile every day. Without that bile, you will feel tired, listless, and listless.

Protection of Roses and Other Plants for Winter

In the parts of Canada where the snowfall is heavy, comes early, and stays all winter, ordinary perennials need no other protection, but in districts where the ground becomes bare in winter a covering of straw, stalks or pine boughs is advisable. Bulbs such as tulips and daffodils should be covered with old manure. At the Central Experimental Farm, Ottawa, it has been found that daffodils sometimes kill out in winter, but a mulch of old manure seems to give the needed protection.

Except in the mildest sections of the country, climbing roses, Hybrid Teas and Hybrid Perpetuals should be covered for winter. As climbing roses have last year's wood, canes must be cut back to ground level or there will be very few, if any, flowers. When the weather turns cool the canes should be taken down from their support and tied together. The bundle of canes should be laid on the ground and earth mounded up around the roots to the height of 12 or 18 inches. In some varieties the canes are stiff and should be bent over as far as possible and tied to a stake that has been driven into the ground. After the ground is frozen the canes should be covered with dry leaves or straw and these covered with boards placed together to form an inverted V, so that water will drain off. It is important that the canes should be kept dry, as moisture may freeze on the bark and damage it. Building paper is sometimes used. In spring the covering should be removed gradually. In places where mice are troublesome, some wheat soaked in poison should be placed under the covering, as they frequently damage the bark of the rose.

Bush roses such as Hybrid Perpetuals and Hybrid Teas bloom on the new wood, so that it is necessary to keep the whole of the stems alive as the plant will grow and flower if cut back to three or four eyes. The earth should be mounded up around the stems as recommended for climbers, and after it is frozen, straw manure, straw or leaves placed over the beds and covered with pine boughs, cornstalks or chicken-wire to keep it in place.

As the amount of protection required for plants varies according to the climate, it is advisable to find out what method has proved successful with other gardeners in the district.

Isabella Preston,
Central Experimental Farm,
Ottawa.

WEEKLY SERMONETTE

"One reason why we run after pleasure so feverishly is to drown the voice of conscience, which is God speaking to us about the folks He says we want to be."

WEEKLY JOKE

"What caused the explosion on Sis's farm?"
"He fed a chick some 'Lay or Bust' feed and it turned out to be a rooster!"

Harvest-Home Services & Supper Great Success

The harvest-home celebration at Knox United Church was a great success. On Sunday last a large congregation crowded the church so that some were obliged to go away.

The singing of the harvest hymns was hearty, and the duet rendered by Mrs. D. Edwards and Mrs. H. Pearson, "God of the Seasons," was greatly appreciated.

The Minister preached, taking for his text the words of Jesus, "I am the Bread of Life," based his subject on the Feeding of the Five Thousand and sought to show that in Jesus is found not only satisfaction for the needs of the individual, but also the way out of the present world difficulties. The sermon was most attentively listened to.

On Monday the harvest-home supper was partaken of by an equal large number and many were the expressions of appreciation of the repast so daintily served by the Ladies Aid.

A public meeting followed, when Rev. G. W. Kirby, B. D., of the Mount Royal College, Calgary, delighted all with one of his characteristic addresses on "Service," in which a ripe wisdom was mingled with much real humor.

Miss Saenger, as usual, sang delightfully and was deservedly encouraged, as were Miss Lissener, Mr. D. Thomen and Miss D. Ranton for their rendering of alto, violin and piano pieces.

At long last the occasion served to emphasize the life and virility of the work which is being done in Knox United Church under the present pastorate.

WEDDING

Mr. Austin Harold Doan, of Penhold, and Miss Violette Johnson of Olds, were united in marriage at the Manse, Didsbury on October 17, 1933. Mr. J. M. Mitchell performing the ceremony.

Pleased With Canada

The magnificient scenery of Canada, enthused Lord Macmillan chairman of the Royal Commission on Banking, that Scotsman thought he be, he came from the British Isles to settle for England on the Islands of Ireland, that it dwarfed the scenery of Scotland, and that the only thing needed was for some author to write the history of the territory of Canada, as Sir Walter Scott had blended the scenery of Scotland with the romantic history of the land of Bonnie Prince Charlie. A lake he visited in the Canadian Rockies he found was more magnificent than Loch Lomond, while his description of Lake Louise was that it seemed to be almost a celestial vision. The British peer in Victoria he asserted to be the most beautiful sight that the eye could rest on - in fact throughout the whole of the continent on the continent Privy Council from the time he wherever he went, and declared that he would carry back with him memories that he would cherish.

Organize Branch
Teachers' Alliance

On Saturday, October 14th, sixty teachers of the Olds school met in the Olds High School and organized a large area local branch of the A.T.A. Mr. E. W. Willis of Innisfail was elected president; Miss Mildred Levagood, of Waterside school, vice-president, and Mr. H. S. Hodgins, of Olds, secretary-treasurer.

Addresses were given by John W. Barnett, provincial secretary of the A.T.A.; H. E. Tanner, M.A., B.Sc., Strathcona High School, Edmonton; Dr. M. E. Lazerte, University of Alberta; A. J. H. Powell, M.A., Vermilion Ave. High School, Edmonton, and Mr. Ainsley, Edmonton alderman.

Dr. Hartman welcomed the teachers on behalf of the Olds school board and invited them to use the Olds school for their meetings. Dinner was served by the Ladies Aid of the United Church in the basement of the church.

In the evening a social and dance was held in the assembly room of the Olds High School.

It was decided that three such meetings would be held annually, the next one to be called shortly after the new year.

During His Majesty's subjects in matrimony is a laudable matter, so let the modern woman beware how she uses her makeup. There is at least one law on the statute books to protect men from their wives.

While scanning an ancient volume just recently, Dr. J. F. Honsberger, Saskatchewan lawyer, came across an act passed by British parliament in 1670 and never repealed, which prohibits women from adding to nature's gifts on pain of being burned as witches.

Here is the law: "All women of whatever age, rank, profession or degree, whether maids or widows shall from the passing of this act impose upon the betroth into matrimony any of His Majesty's male subjects by scents, paints, cosmetics, high-heeled shoes, or bolstered hips, shall incur the penalty of the laws now in force against witchcraft."

"American Madness!"

"American Madness," which is appearing at the Opera House this Friday and Saturday, is one of the great stories of today. It is a dramatic thrillbore challenging a nation!

The story depicts conditions as they are today, and it is a picture that everybody can enjoy.

CARD OF THANKS

The ladies of the Eastern Star wish to thank Mr. and Mrs. Weber for their help at the recent waffle supper. Mr. and Mrs. Weber donated the Rosebud Pancake Flour and baked the waffles.

LOCAL & GENERAL

Mr. and Mrs. E. G. Ranton paid a visit to Calgary on Wednesday.

Mrs. R. Peck left this week for Lacome to visit her son, Mr. Joe Peck.

Miss Doris Warren, of Calgary, was the guest of Miss Bernice McGhee for a few days this week.

Miss W. McKinnon and daughter of Winnifred, visited this week with her nephew, Mr. Jim Cuthness and family on her way to the coast.

A surprise birthday party was given at the home of Mr. and Mrs. J. A. McGhee in honor of their daughter Bernice. Three tables of bridge were enjoyed and a delightful lunch served by the hostess. The following guests were present: Misses Dorothy and Grace Ranton, Aimee, Vera and Millie Lovlie, Bea Kendrick, Joyce Moyle, Margaret Geiger, Nellie Hugot, Jessie McCoy and Doris Warren, of Calgary.

For Sale—Holstein Bull, Calif. 10 months old, registered. Also Medium Size Heifer, new condition. (404p)

W.M. Smith, R.R. 2.

For Sale—One Yearling Hampshire Registered Ram. Could also winter at 50 head of stock. Lots of water and feed. Apply: Billy Coates Junior, R.R. 2, Didsbury (412c)

For Sale—Hampshire Sow with litter of ten. Apply: (42p) Jas. Tate, R.R. 2, Didsbury

For Sale—Purchased Jersey Bull, 7 years old, with papers. Apply: (424p) Fred Snyder, Westcott.

We have a fresh supply of scratch pads now ready. Especially useful for school, store or telephone 2 for 5 cents.—Pioneer Office.

See M. C. Russell for Baling Hay! Prices Right. Enquire at: (42c) Henry Goethring, Didsbury

FOUND

Found—One Grey Mare, branded H, inverted half diamond under brand, at my place on Sec 22 (tp 3w 3s 5th m) : (42c) Jack Robertson, Westcott.

Found—License Plate with Silver-Town Safety League badge. Owner can obtain information at Pioneer Office.

Here's One Way

To Save Money

Everyone is asking himself the question "How can I economize?" "How can I reduce the Cost of living?" One answer is found to this.

Bring your wheat to the Didsbury Flour Mills to be Milled or Exchanged for Flour.

WHAT YOU CAN SAVE

2 2 3 Bushels of Wheat at 39c. \$1.04

Cost of Milling 2 2 3 bushels at 25c per bus. .67

1.71

Less value of 60 lbs Bran and Shorts you receive .30

Actual cost of 98lb Sack of Flour \$1.41

Or at to-day's price of wheat we will exchange 98lbs of Flour for 4 Bushels of No. 1 Wheat, you to supply sack.

You can plainly see that there's a big saving in having your wheat ground at to-day's prices.

We Guarantee Every Sack of Flour

Men Make The State

Picking up a copy of the Moose Jaw Times the other day, the writer's attention was drawn to an article entitled "Men Make Cities" which opened by quoting the following inspirational lines of an unknown poet taken from the September issue of The Rotarian:

Men are what men make them,
What men demand they shall be;
Slothful, sloven, and sleeping,
Procrastinators, weaklings;
If the hours of the banters are noble,
In one with the day and the need,
They will build into grandeur and greatness,
For so it was decreed.

These lines it is stated were inspired by the achievement of Atchison, Kansas, as told by Ed. W. Howe, editor of the Atchison Daily Globe. Atchison is one of the smaller cities, but in twelve years it has evolved from a bankrupt, tax-broke city, a slothful, sloven, and sleeping, into one that is "progressive, beautiful, free," with its bonded debt cut 70 per cent, and even with this fine record was being made its tax rate was reduced by 50 per cent.

How was it done? In 1920 a group of citizens, noting the seriousness of the situation, started a movement to save the city, a new idea took hold of the administration, expenses were cut, and plans formulated to enable the taxpayers to handle the load and reduce the bonded debt and the over-head, and the creditable record was not interrupted through three years of the hardest times ever known, largely because lost courage and confidence was restored.

The Rotarian magazine tells the story in an editorial challenge to Rotarians in every city to be up and doing for the welfare of their home town, to study its problems and to act. The Moose Jaw Times applies it directly to its own city and declares the challenge comes at this time not only to Rotarians but to every member of every service club of Moose Jaw.

The writer of this column in passing the story along would make bold to still further enlarge the field of its application from city or town to the citizenship of every community, large or small, because it is just as true that men, and women, make rural communities and little villages as it is that they make cities. It is also true that in these days our rural communities, hamlets and villages are confronted with problems, which, considering their population and resources, are just as heavy and serious as those of the larger cities, perhaps even more so.

Furthermore, because of the very nature and extent of the world-wide depression which has developed, all communities large and small, find themselves much in the same position. One cannot in their emergency turn to another, because all are adversely affected, and while the willingness to assist may be there the ability to do so is lacking. So communities are thrown back on their resources to a greater extent than formerly.

Again, this has resulted in much purely voluntary work by individuals and organizations being restricted, leading to both individuals and communities turning to and relying upon the State to take over and assume their problems. The net result is a weakening of the morale of the individual, a loss of courage and confidence, the development of habits of slothfulness, and a deterioration of initiative and enterprise. Instead of men adhering to the truth that they make cities and nations, thousands are adopting the false theory that cities and nations make men, and that, instead of it being the duty and responsibility of men to order their lives and make their communities, it is the duty and responsibility of the State to order the lives and control the actions of the doctored individual thus reversing the order of the natural relationship and direction of the State.

Observant men and women are more and more coming to the view that the time has arrived to call a halt to this increasing reliance upon the State, and to renew their belief in the truth that they make cities. Atchison, Kansas, they must save themselves and their city by action on their own part, that instead of allowing their difficulties and problems to swamp and overcome them, they must overcome their problems and surmount their difficulties. It can be done. It has been done times without number by individuals and communities in the past.

Indeed, if it is not done both the individual and the community, large or small, faces ultimate disaster. The individuals will find himself submerged and his individuality largely gone, while the community will end up in complete bankruptcy and the loss of its local freedom and autonomy.

On the other hand, if the men, and women, of a community, be it a small village or a large city, bathe themselves, face and study their problems, and proceed to grapple with them one by one, they will be surprised how much they can accomplish. It will mean the abandonment of existing policies of drifting with the adverse tides. It will mean the lopping off of this expenditure and that, it will mean the application of the most rigid economy in all public administration; it will involve a more active participation by this individual citizen in effecting community savings; it will necessitate community sacrifices for a time just as thousands of individuals have had to make individual sacrifices. But it will mean ultimate success both for the community and the individuals who constitute and make the community.

In a word, it means a return to the proper and sound conception that men make cities, not cities make men. And in using the term cities the application is to all organized communities whether rural or urban, large or small.

South Shields, England, is building 312 houses for the aged. A solution of bicarbonate of soda will make an excellent white ink.

Any Looseness of the Bowels Is Always Dangerous

When the bowels become loose and diarrhoea, dysentery, summer complaint and other bowel troubles set in, immediate attention should be given and the discharges checked before they become serious.

To check these unnatural discharges there is a remedy in Dr. Fowler's Extract of Wild Strawberry, a remedy that has been in use for over 88 years. It is rated, reliable and effective in its action. A few doses in generally all that is required to give relief.

Get it at your drug or general store; put up only by The T. Muhum Co., Limited, Toronto, Ont.

British Railway Regulation

No-Smoking Order In Compartments To Be Enforced

In future, all passenger coaches on the London, Midland and Scottish Railway will bear a distinctive label "smoking" or non-smoking." About 10,000 vehicles, with a seating capacity of more than 1,000,000 will have to be dealt with. Probably a year will elapse before the change-over is complete.

"We have had many complaints," said an official, "about people smoking in non-smoking compartments. They take the view that as smoking is not definitely forbidden they may smoke if they wish to do so. When the new labels are affixed on one will be allowed to smoke in a non-smoking compartment, even if other passengers say they have no objection. Smoking is allowed in 75 per cent of coaches and it is not proposed to alter this proportion."

Other railroads in the United Kingdom have carriage labelled in various ways, meant to indicate they are either for smokers or non-smokers.

CAST OFF UGLY FAT

Woman Loses 28 lbs. in 3 Months

"Three months ago a woman writes: 'I am pleased to tell you I have lost 22 lbs. I had tried other things, but all to no avail. Now I know that Kruschen Salts are different. I have lost 22 lbs. and I feel much younger. I really feel I have lost 28 lbs. to date.' — M. S. S. G."

If you are overweight, take one half-teaspoonful of Kruschen Salts in a glass of hot water before breakfast every morning. These salts will not add to your weight of weight, but just a steady decrease of that daffy fat which is as unhealthy as it is unsightly. Kruschen Salts is a scientific product, and has been found in the waters of those European spots that have been used by generations of overweight people to reduce weight.

Rising Tide Of Fascism

Warning Is Sounded By Secretary Of Workers' League

Warning against the "rising tide of Fascism" as exemplified by the Blue Shirts of Canada, was sounded by J. C. Wilson, of Winnipeg, National Secretary of the Workers' League, at an open meeting of returned soldiers at Windsor, Ont.

"I understand the slogan of the Blue Shirts is 'Join us and get a job of beans.' Mr. Wilson said, 'In Winnipeg we formed the Old Contemptibles and had the same slogan. The only job offered us was police duty during trouble, a job now filled by 62 members of the Canadian Legion.'

"There is no job for them except as street troops for a Fascist government. That is their role, the same role as Fascists in Vancouver, strong-arm squad of Winnipeg, and Steel Helmets of Montreal."

"The time has come when you, as your economic needs, as the only effective must unite and fight for your economic needs, as the only effective weapon to combat the rising tide of Fascism and possible war in six months."

Pains After Eating? Try This!

Pains after eating are generally due to an excess of acid in the stomach that forms gas and causes belching, heart burn, bloating, sour stomach and indigestion. Bismuth Subnitrate after meals will stop these quickly and please relief you will be surprised. Any druggist will tell you ordinary Bismuth Magnesia is fine for sour indigestion. It should be in every home. It works.

Tom Of Viking Chieftain

Discover Grave Of Warlike Buried 1,000 Years Ago

The tomb of a Viking chieftain, buried more than 1,000 years ago, was recently found at Laingford in eastern England. The chieftain's sword showed the warrior was of high rank and furnished an interesting example of the burying customs of his day. He had been interred with full armor and with a fine sword, evidently made in the south of England.

The sword hilt was decorated with silver ornaments, on one of which some magic runes had been engraved.

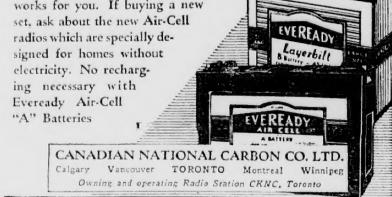

Longest Lived Trees

Older than the pyramids or sphinx of Egypt—Older than the first city built by Cain—Many of the big trees in the world may have been living when Adam walked the earth. English Oaks are also noted for their long life—trees are now standing which were large enough to cut for lumber when the mailed Knights of William the Conqueror landed in the year 1066.

EVEREADY LONGEST LIVED RADIO BATTERIES

It's long life that saves money on battery upkeep. You get longer life from Layerbatt Batteries because they are crammed full of power-producing material. No waste space in the flat layers. Every inch works for you. If buying a new set, ask about the new Air-Cell radios which are specially designed for homes without electricity. No recharging necessary with Eveready Air-Cell "A" Batteries.

Investigated Northern Lights

Scientists Have Spent Fifteen Months At Fort Rae

Aurora borealis dash across the northern sky some 60 miles above the earth, according to calculations made by members of the British polar year expedition who arrived at Edmonton by aeroplane after 15 months spent at Fort Rae, North West Territories, studying weather conditions in the far north.

Five members of the party, A. Stephenson, who was formerly with the Vikings expedition in Greenland, P. A. Shepherd, R. Morgans, W. A. Grinstead and J. F. Kennedy arrived in a MacKenzie Airways aeroplane piloted by Matt Berry, Dr. J. M. Stagg, leader of the expedition, returned by river boat with the valuable instruments used in investigations.

Results of their observations will not be revealed until the voluminous data on meteorology, terrestrial magnetism, aurora and atmospheric electricity as analyzed after their return to England, the scientists stated.

"We simply made the observations and collected the data," Mr. Grinstead explained. "The results of our work are not yet ready for publication."

In all, 4,000 daily photographs of the northern lights were taken by means of cameras on either end of a telegraphic line placed 20 miles apart.

Cameras and instruments were focused on a star and the photographs taken instantaneously. Thus by means of triangulation the distance and action of the northern lights could be estimated.

CREAMED CELERY AND GREEN PEPPER

One and half cups celery (cut in one-inch pieces); 1 green pepper; 3 tablespoons butter; 3 tablespoons flour; ½ teaspoon salt; ½ teaspoon pepper; ½ cup evaporated milk; ½ cup water; 6 slices toast.

Cook celery until tender. Drain and mix with sliced green pepper. Melt butter in double boiler. Add flour and stirring constantly until mixture thickens. Add water and boil ten minutes longer in double boiler, stirring occasionally. Add celery and green pepper. Serve on toast if desired. Serve hot.

Better Conditions Due To General Upswing

Improved Business In Canada Not Credited Wholly To N.R.A.

Figures issued by the Dominion Bureau of Statistics indicate business conditions in Canada have been steadily improved since March of this year, before the National Recovery Act was passed in the United States.

Although officials of the Canadian Manufacturers' Association would not express an opinion as to whether the increase in Canada's export trade as reported from the Department of National Revenue at Ottawa, was due to influence of the N.R.A., Dominion statisticians indicate it was not a major influence.

Physical volume of business, industrial production, manufacturing in the Dominion, along with export trade started on an upward trend in April, improving steadily in following months. Canada's trade "low" was reached in January-February.

Although the N.R.A. has been given the National Recovery Act by manufacturers at Toronto, for improved conditions, owing to the influence of conditions in America on Canadian trade, it is considered improvement is principally due to a general upswing in world conditions.

Dairy For Prince Albert
Believing Prince Albert is headed for better times, F. R. Glass, of Kerrobert, announced his plans to establish a dairy there for the retail distribution of pasteurized milk and cream. He has acquired 1,300 acres near the city and built a barn to house 40 Holstein cattle he intends to buy from Kerrobert, where he now operates a dairy.

Unjustified Pessimism Is Chief Trouble Of Wheat Market, In Opinion Of Western Economist

Unjustified pessimism is the chief immediate trouble of the wheat market, according to Dr. W. W. Swanson, head of the Department of Economics in the University of Saskatchewan, who was in Montreal.

The importing countries of Europe have not yet reached their pre-war acreage in wheat. Dr. Swanson claimed, and have considerably reduced their growing of rye. The lessening of imports in Europe is due to no increase in acreage, but to extremely high yields this year and last year. This, he suggested, could not be taken as a permanent factor.

Dr. Swanson drew attention to the statement of B. W. Show, American wheat statistician, that current United States government estimates of wheat stocks in that country were about 100,000,000 bushels too high and that there was actually no surplus when there is excess of domestic consumption and a small carry-over for safety.

As to the "blue eagle" campaign in the United States, Dr. Swanson declined comment other than to say he had never seen any case where the people had avoided the penalty of part extravagance by refusing to admit it existed.

He had been a witness before the royal commission on banking and currency at Saskatoon and consequently declined to comment on the commission beyond an expression of admiration for the manner in which Canadian banks had met the world economic crisis and his opinion that the personnel of the royal commission was a complete guarantee its report would be constructive.

Problems Of Dairymen

Want Eastern Canada To Export Fair Amount Of Butter

Working through the National Dairy Council, the three prairie provinces have made modest efforts to induce manufacturers in eastern Canada to export a fair amount of butter. That effort started right after a Canadian butter surplus of 9,000,000 pounds was announced August 1. To this date the western provinces have received no indication that any butter would be shipped to the old country from the east, according to P. E. Reed, Saskatchewan Dairy Commissioner and Secretary of the Western Dairy Association.

Mr. Reed said Saskatchewan had shipped slightly more than 1,000,000 pounds to the market overseas. That business, he declared was done at a net loss, the loss being heavier in the earlier shipments than the later ones, the result of better prices obtaining in England.

Model Of Tower Bridge

London's Famous Structure Reproduced By Farmer With Crude Tools

A model of London's famous Tower Bridge, eight feet long, two feet high and 14 inches wide, has been made from wooden boxes of the packing or cigar variety by B. O. Brown, a farmer of Lyden, Saskatchewan.

It took two winters of steady application to the job and three-and-one-half weeks to paint it.

The tools were a small plane, jack-knife, razor blades, fire saw, set of glass and sandpaper. Gopher tails were used for paint brushes.

Although he has never seen the structure he set to work and built it for his son. He has not seen the bridge, as it stands in London, either.

Canada's Sugar Refineries

Sugar refining is a considerable industry in Canada. Eight refineries operate in the Dominion: one at Dartmouth, Nova Scotia; one at Saint John, New Brunswick, two at Montreal; one at Chatham, and one at Wallaceburg, Ontario; one at Raymond, Alberta, and one at Vancouver, British Columbia. The value of production from these eight refineries in 1932 was \$10,222,580.

Aeroplanes are delivering supplies to ice-bound lighthouses near Warnings, Germany.

Tenants Had To Use Ladders

Burglars Stole Staircase From Apartment House In France

Not even staircases are safe from the twentieth century Parisian burglar.

Tenants living on the third floor of a French apartment house got up to go to work one morning and found they couldn't go there. There was no staircase. It had been removed in the night by burglars.

Telephones and windows had been left intact, however, and while some stood across the street to their incredulous neighbors others telephoned the sceptical police, who eventually out the fire department. Third floor dwellers had to use ladders for the next two weeks while new stairs were being installed.

Telephones and windows had been left intact, however, and while some stood across the street to their incredulous neighbors others telephoned the sceptical police, who eventually out the fire department. Third floor dwellers had to use ladders for the next two weeks while new stairs were being installed.

AN IMPORTANT UNIQ ENSEMBLE THAT FITS THE FIGURE —GIVES SLENDER APPEARANCE

Here's a pattern that includes pants to match your slip. Think of pants and you have something to do. If you are not used to buying a slip and pants that match.

You can make this darling set in a simple morning. It's simplicity itself. It's surprising how little it will cost.

The slip, cut on princess lines, has a belt and is joined at the neck and hem with lace. The pants have a fitted yoke and circular legs, not too full. The edges are trimmed with narrow lace to match the slip.

It's very effective in pale pink crepe silk with lace lace. The edges may also be finished with bias binding.

Size 816 is designed in sizes 12, 14, 16, 18. The sizes 36 and 38 inches bust. Size 16 requires 3½ yards of 36-inch material with 3½ yards of 2-inch lace and 2 yards of 5-inch lace.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Highway Mileage

Surfaced Roads In Canada Amounted To 91,312 Miles In 1932

The surfaced highway mileage in Canada at the end of 1932 amounted to 91,312 miles, and unsurfaced roads to 307,000, making a total of 398,320. This includes all roads outside of incorporated cities, towns and villages under the jurisdiction of the provincial highway departments, also roads such as roads to the departmental roads as far as the mileage was sustainable by the departmental roads. It also includes some roads in unincorporated villages and hamlets which quite properly might be classed as streets. The figures were released by the Dominion Bureau of Statistics.

Gravel roads increased from 75,051 miles to 80,183. Cement concrete roads were located almost entirely in Ontario and Quebec, only three per cent of the total being in the other provinces. The increase in this high class type of road was 433 miles, or from 1,584 to 2,017.

The total expenditure on road construction in 1932 was \$45,867,491, including subsidies from the Dominion government for relief work and for the elimination of rural level railway crossings.

Consumer Wants Good Honey

Demands Same High Standard As Other Foods

In the case of a food product the producer owes to the consumer extreme care in preparation of that product for the market to see that it is wholesome, clean, attractively packed and equal to the standards under which it is advertised and labelled. The honey producer had things very much his own way until a few years ago because demand exceeded supply and honey sold quite readily without too much fussing around with it. Today, however, conditions are somewhat different. More honey is being produced, competition has become keener and the buying public has become more discriminating in its choice. The consumer has been educated to buy goods graded to definite and uniform standards and is demanding similar standards for honey and these demands cannot be ignored. The consumer is willing to pay for quality produce and as he has the final say as to what he shall buy, his wants must be considered. The producer who fails to recognize this fact might just as well change his profession first as last. C. E. G. Odham, Dominion Apiarist.

Makes Difficult Ascent

A. H. Marshall, of Vancouver, B.C., a member of the Seattle Mountaineers Club, and John Nulsion, instructor of languages at University of Cincinnati, recently reached the summit of soaring Granite peak near Red Lodge, Montana, after a day and a half of arduous climbing. Marshall and Nulsion were the sixth and seventh persons ever to scale the peak.

Dogs are the most affectionate of animals. The only animals that prefer the company of man to their own kind. Cats can't be trusted to a cold, hard, and often of similar quality.

Further, there was no evidence that modern methods of canning affected the nutritive value to any greater extent than ordinary cooking.

Keeping Standard Measurements Is One Of The Most Difficult Problems Confronting Scientists

Preventive Medicine

Mental Health Is Just As Important As Physical Health

Preventive medicine is as concerned with mental health as physical health. Dr. Grant Flemming, of the Department of Public Health and Preventive Medicine, McGill University, told the annual convention of the Alberta Medical Association at Calgary.

"There are more beds in our mental hospitals than in our general hospitals," he said. "The number of people who live unhappy lives because they are not mentally happy is large."

Dr. Flemming declared progress in the field of preventive medicine awaits the development of the science of medicine. "The medical profession is to take part it must be prepared to act as a group. In addition to local organization taking its part in public health, the profession must provincially and nationally define the role it would assume in the realm of preventive medicine."

Dr. Flemming referred to improvement of health of infants, to schools and industries recognizing the importance of health in establishing the health of the individual and departments. The private practitioner has had little part in this development, he said. Health supervision should be given by the family physician who should assume responsibility for smallpox vaccination and diphtheria immunization.

"Preventive medicine enters into this problem because it has sufficient knowledge to justify a program of prevention of mental disease and promotion of mental health. The physician must study the mental field," he declared.

Nutritive Value The Same

Frozen Meat As Good As Fresh Research Committee Reports

Frozen meat is as good as fresh meat, according to the research committee of the Royal Agricultural Society of England. The committee has reported having inquired of the department of scientific and industrial research regarding the relative merits of fresh meat as compared with tinned, chilled or frozen meat.

A reply had been received from the ministry of health stating that on the knowledge at present available there is no recognizable difference in nutritive value between frozen, chilled and fresh meat of similar quality.

Further, there was no evidence that modern methods of canning affected the nutritive value to any greater extent than ordinary cooking.

Decorated By King

While the royal train was speeding from Aberdeen to Ballater, Scotland, recently, King George presented the M.V.O. to William Johnston, traffic superintendent of the North Scottish district, who was retiring after 32 years of railway service.

Caller: "Good morning, Mrs. Smith. I believe you sent for a locksmith?" Mrs. Smith: "Yes, come in. We've lost the key of the tin of sardines."

"Did I ever tell you, dear, about when I broke my shoulder strap?"

The Humorist, London

Really accurate measurement is still one of the most ticklish problems of science, and of all measurements done in England, the most ticklish are in connection with the examination of the imperial standard yard and pound and the official copies of them. This is a job that has to be done, by statute, every ten years at the National Physical Laboratory at Teddington. The scales, for comparing the pounds, have been specially designed and built by the Laboratory. They live in a nice cool vault which was once the wine cellar of King William IV. The scales have five controls, three of which are merely designed so as to meet the load, small as it is, taken up gradually—to avoid any risk of jarring the beam. These controls are worked by knobs projecting "through the door of the vault, so that there shall be less chance of inaccuracies arising through the presence of a moving body, air disturbance, or any such tiny phenomena."

The pounds are cylindrical lumps of pure platinum, surprisingly small—unless you fully appreciate what heavy stuff platinum is. They are about two inches high, and of the same diameter as a half-crown. The intrinsic value of the metal in each is worth about £500.

And the new scales weight to an accuracy of one part in one hundred million.

The yards cannot be measured quite so accurately as the pounds can be weighed, but they are measured to within one ten-thousandth part of a millimetre.

The standard yard is a bronze rod of "Mr. Bally's" metal (the late Mr. Bally, who invented this particular bronze alloy). Holes are sunk at each end of the rod, and at the bottom of each hole is a small gold plug with the standard length of a yard. The distance between the centre of the holes is one yard. That is the only and final and complete definition of a yard, and ultimately of all our units of length.

The most interesting scientific fact that has been established by these measurements is that plain metal is more stable, in size, than an alloy. An alloy, containing a large proportion of iron, has been used for one modern copy, and for the past thirty years this yard has been growing, so that it is now a whole thousandth of a millimetre larger than the standard yard.

Of course, it may be that the standard yard and its older copies are a little shrinking. Well, that does not matter, for it is the old yard that is a yard, whatever happens.

An Economic Garden

Includes Different Plants From All Parts Of World

An economic plant bed is being established in Boston's public garden.

It is composed of 24 different plants from all parts of the world which provide man with needs from plants to bananas.

Plants selected for the bed included:

Black pepper, peanuts, pineapple, ginger plant, cocoa, silk oak, vanilla, rambie, flax, sugar cane, calabash tree, soapberry, Mexican cocoa tree, tobacco, stemless screw pine, Malay candle nut, alligator pear, Malay apple, oil, hosting hemp, date palm, camphor tree, coffee plant, thatch palm, cotton plant, fan palm, and banana tree.

Egg Export Trade Better

Larger Section Of Country Is Interested This Year

Steadily increasing activity in the egg export trade, particularly in the only item of interest, the egg market, is shown in the following table from the market report of the Dominion Department of Agriculture. In the centres notably Winnipeg, a number of other cities export movements are beginning to move. It is a long time since interest in the egg export trade was spread over such a large section of the country as in this case this year, the report added.

There are about 295 navigable streams in the United States.

A REMINDER!

A few years ago thousands of Alberta farmers petitioned and worked for the building of Alberta Pool Elevators. As a result the Pool system covers the Province in a close network.

The same reasons which inspired grain growers to ask for the service and protection of this co-operative system of elevators suggest that patronage should continue to be extended to them on a generous scale.

Bride-Elect Entertained

Mrs. J. A. McGhee and Mrs. Artis Hayes entertained at a bridge and bridal shower in honor of Miss Rae Clements on Saturday evening. Twenty-four guests were present and bridge honors went to Mrs. Hawkes 1st and Mrs. Evans, consolation.

On Wednesday evening Miss Lucille Smith entertained a number of young ladies at a kitchen shower in honor of Miss Clements. Five tables of bridge were enjoyed.

The bride-to-be was the recipient of many beautiful and useful gifts.

Mountain View Notes

Several members of the W.L. motored to town Wednesday last to attend the regular meeting held at the home of Mrs. Harry Pearson. It was decided not to hold the annual bazaar this season, and the quiet to be observed for the member who had been wrecked last week was to be commenced last week and left in the hands of the vice-president to be completed. After the business an interesting paper was given. A pleasing feature of the afternoon were the solos rendered by Mrs. Fisher and the piano selections from Miss Dorothy Ranton. The next meeting is being held today (Thurs.) at the home of Mrs. Ranton.

A dance is being held in Community Hall this Friday evening under the auspices of the Odd Fellows of Didsbury.

Miss Doris Brown spent Thanksgiving in Calgary.

Mrs. A. M. Nisbet, Mrs. P. Thomas and Miss Marie Towers, were visitors at the B. A. Atkinson home Friday last.

Mr. and Mrs. R. McCoy, Miss Caswell, of Red Deer, and Mr. and Mrs. W. E. Towers, of Calgary, were visitors in Mountain View over Thanksgiving.

Westcott Notes.

The September meeting of the W.L. was held at the home of Mrs. E. Webster. There was a good number of members present to assist in tying the quilts to be sold at the annual bazaar. A feature of the meeting was the judging of a gingham contest, and it proved surprisingly the variety of attractive and useful articles fashioned from this fabric. The ladies also decided to sponsor a hyacinth contest, each member to take two bulbs. Plans were discussed regarding the annual bazaar to be held in the Westcott school, Friday, November 17th. A play, "The Spinster's Return" featuring the fortunes of the members of the Spinster's Convention of 1931, is to be given on that evening for your entertainment. Keep this date in mind and come to Westcott school to laugh at the havoc mere men make of the spinster's lives!

Melvin Notes

Don't forget the Hallowne Party at Melvin school on Friday evening, October 27th. Come and have a good time at the first social event of the season!

Messrs. Chas. Foss, Lloyd Chandler and Jay were in Calgary on Saturday.

The Westerdale Ladies Aid met at Mrs. G. Carlson's on Wednesday, when they quilted a quilt.

Mr. Artis Troyer, of Castor, is spending a few days with Mr. and Mrs. Peter Johnston.

Mr. and Mrs. August Krebs spent Sunday at the home of Mr. Charles Foss.

Mr. and Mrs. Ed. Vetter and family, of Three Hills, spent the weekend with Mr. and Mrs. Peter Johnston.

Miss Ray and Miss Bohanan attended the meeting of the teachers at Olds on Saturday and report a very profitable time.

Miss Marian Johnston is helping Mrs. Wm. Stickney for a few days before the sale. Friends and neighbors regret very much the losing of an old timer and good neighbors.

Shall we see you at Community Hall tomorrow night?

LOCAL & GENERAL

Attention, Teachers!—We have in stock a specially designed report card for public or rural schools. Call in and see sample.—Didsbury Pioneer

The Didsbury Odd Fellows are holding a harvest dance at Community Hall tomorrow evening (Friday). Music by the Reddekkop 6 Piece Orchestra. Members who live east will see that this dance is made a real success.

The funeral of Mr. Fred Hansen who was killed Tuesday of last week, was held Saturday from Durrer's funeral chapel. The Rev. Mr. Knudson, of the Danish Lutheran Church, conducted the services, and about twenty-five friends from Calgary attended the ceremony.

Finding the city of Calgary had been negligent with respect to handling the log intersection of 8th Avenue and 1st Street West on January 9th of last winter, Mr. Justice Bogh handed down judgment last Wednesday afternoon, awarding Lottie Cameron, of Lethbridge \$700 compensation for a fall, and \$325.65 to meet expenses to which she was put as a consequence of injuries sustained.

Mountain Goat
Charges Automobile

Having his new car damaged through being charged by a mountain goat, was the unique experience of Mr. Gray Sharp on Friday last.

Mr. Sharp, who had been installing a new pipe line from a steep and winding drive to Edmonton, was about 17 miles from Jasper when a mountain goat apparently objected to the shiny appearance of Gray's Ford and charged the car.

Lottie Cameron, of Lethbridge \$700 compensation for a fall, and \$325.65 to meet expenses to which she was put as a consequence of injuries sustained.
